ABOUT TOPSIM – INSURANCE

Participants of TOPSIM – Insurance take on the role of the management board of a typical insurance company (primary insurer). They make strategic and operational decisions for up to three insurance lines: liability, accident, and building insurance. Within these lines, products are offered in up to three customer segments (industry, commercial enterprises and private individuals).

TECHNICAL LEARNING OBJECTIVES

- ▶ Understand the basics of the insurance industry
- ▶ Deepen insurance expertise such as asset management and risk management
- ▶ Develop, implement and adapt corporate strategies
- ▶ Apply holistic and cross-divisional thinking, consider controlling aspects and market positioning

GENERAL LEARNING OBJECTIVES

- ▶ Make efficient team decisions, even under time pressure
- ▶ Evaluate company data
- ▶ Select and implement strategies to achieve goals
- ▶ Consider framework conditions in a dynamic competitive environment
